Projects

Allurea — Full-Stack eCommerce Management Platform
GitHub: https://github.com/Fatema-Akther/ecommerce-platform-backend
Live Demo: https://sumashop.xyz/

Next.js | NestJS | TypeScript | PostgreSQL | Tailwind CSS

- Built a full-stack eCommerce platform with customer shopping workflows, admin dashboard, product management, and order processing capabilities.
  Developed product management, inventory tracking, cart, checkout, order processing, and admin workflows.
- Created backend REST APIs using NestJS and integrated PostgreSQL for data management.
- Implemented shipment tracking, order monitoring, and business management features.

Velora — Fashion eCommerce UI
GitHub: https://github.com/Fatema-Akther/velora-ecommerce-frontend
Live Demo: https://e-commerce-frontend-project-2.vercel.app/

Next.js | React | TypeScript | Tailwind CSS

- Developed a responsive fashion storefront with modern layouts and reusable components.
- Implemented product browsing, filtering, category navigation, and shopping interactions.

Zivana — Responsive Fashion eCommerce Storefront

GitHub: https://github.com/Fatema-Akther/nextjs-ecommerce-ui
Live Demo: https://e-commerce-frontend-murex-mu.vercel.app/

Next.js | React | TypeScript | Tailwind CSS

- Created a mobile-first fashion shopping interface with clean UI architecture.
- Focused on responsive design, component reusability, and user experience.

Education

BSc in Computer Science
American International University-Bangladesh (AIUB)
Graduation Year: 2026
